

POLITICK

Claude Code UI Refresh Guide

Exact implementation guidance for reproducing the approved mobile screens

Visual source of truth

The attached mockup sheet is authoritative. Claude should reproduce its visual language and screen structure, not reinterpret the brand or substitute a generic news-app design.

What Claude must preserve

The product should feel like a calm civic utility: polished, editorial, useful and politically neutral.

- Warm Paper background with crisp white cards and restrained borders.
- Lowercase politick wordmark in a modern geometric sans. Signal Gold is the only decorative brand accent.
- Deep Teal primary actions, Civic Teal active states, Civic Ink text and Slate metadata.
- Finite, structured information rather than dense dashboards or infinite-scroll news clutter.
- Plain-language hierarchy: what happened, why it matters, your connection and what comes next.
- Rounded, understated components with generous space and no dramatic shadows.

Do not redesign

Do not add patriotic imagery, red-versus-blue treatments, stars, flags, eagles, Capitol decoration, heavy gradients, glassmorphism, neon, oversized illustrations or cable-news urgency.

Tokens and visual rules

Token	Hex	Use
Civic Ink	#101418	Primary text, wordmark, icons
Paper	#F7F6F2	Page background
White	#FFFFFF	Cards and sheets
Civic Teal	#167D79	Selected controls and links
Deep Teal	#0D5F5B	Primary buttons and dark brand fields
Signal Gold	#D9A441	Small emphasis, active underline, signal dot
Slate	#5D6670	Secondary copy and metadata
Soft Teal	#DCEFED	Selected chips and info panels
Warm Sand	#EEE9DE	Editorial callouts
Line	#DDE1E5	Card and control borders
Action Coral	#B84E3C	Errors and urgent deadlines only

Typography

- Use Inter for UI, cards, navigation, forms, metadata and the lowercase wordmark foundation.
- Display 32/38 700; H1 26/32 700; H2 20/26 650; H3 16/22 650; body 16/24; compact 14/20; label 12/16 650; micro 11/14 500.

- Sentence case throughout. Tiny category labels may use uppercase. Never shrink body text below 14 px.

Geometry

Element	Specification
Mobile canvas	390 x 844 reference viewport; responsive after parity is achieved
Horizontal padding	20 px
Base grid	8 px; 4 px micro-adjustments
Cards	16 px radius; 1 px Line border; white surface
Sheets	24 px radius
Buttons	12 px radius; 48-52 px height
Chips	Fully rounded; 32-36 px height
Touch targets	Minimum 44 x 44 px
Section spacing	24 px
Motion	150-220 ms slide/fade only

Shared structure across all mobile pages

Region	Rule
Status bar	Use native-safe top inset; never crowd the Dynamic Island or system status area.
Top app bar	20 px side padding, 56-64 px tall. Lowercase politick wordmark or page-specific back/title controls.
Content	Single vertical column. White cards on Paper. Major sections separated by 20-24 px.
Bottom navigation	Five destinations: Today, Explore, Representatives, Saved, Profile. Active item uses Deep Teal icon and label.
Card anatomy	Eyebrow/meta → headline → concise context → relevance/status → action. Keep repeated placement consistent.
Scrolling	Natural vertical scroll. Bottom navigation remains fixed. Avoid nested scrolling except horizontal chips.

Core components

- AppHeader
- ProgressDots
- PrimaryButton
- SecondaryButton
- TextLink
- ZipInput
- PrivacyNote
- SegmentedControl
- RepresentativeRow
- NotificationChoiceCard
- DailyProgress
- TopicChip
- StoryCard
- StoryDepthTabs
- StorySection
- SourceRow
- SourceTabs
- RepresentativeHero
- ContactAction
- ProfileTabBar
- SearchField
- SettingsRow
- BottomNav

04 / ONBOARDING

Five-screen setup flow

Screen	Required layout and behavior
1. Welcome	Top progress label "Onboarding 1 of 5." Large two-line title. Short value proposition. Calm civic illustration occupying the middle third. Full-width Deep Teal "Get Started" button and low-emphasis sign-in link.
2. ZIP code	Title "Where do you live?" Supporting text. Label and 56 px input with location/arrow affordance. Privacy note with lock icon. Continue button pinned near lower content edge; disabled until valid 5-digit ZIP.
3. Representative confirmation	Title and local context. Segmented control Local / State / Federal. White representative list card with photo, role, name, office and chevron. "Looks Right" primary action and "Edit ZIP Code" tertiary action.
4. Notifications	Title "Stay in the know." Two large selectable cards: Daily Briefing and Breaking Updates. Radio indicator on right. Primary "Let's Go," tertiary "Set this later." Default only Daily Briefing selected.
5. Completion transition	Brief confirmation state, then route into Today. Keep animation subtle: 180 ms fade/slide.

Illustration guidance

Use a flat, muted city/civic scene with natural civic context. No flags, rallies, partisan crowds, gavels or caricatures.

Daily 5 feed

- Header: lowercase politick wordmark left, notification bell right.
- Greeting and date appear before “Your Daily 5.” Use concise supporting copy such as “5 important stories. 5 minutes.”
- Progress bar is thin, teal and calm; show numerical completion at right.
- Filter chips: All, Local, State, Federal, World. One selected at a time. Selected chip uses Deep Teal fill with white text.
- Story cards are white, bordered, 16 px radius, with bookmark top-right and 72-88 px documentary thumbnail on the right.
- Each story exposes category, read time, factual headline and one-sentence practical context.
- Use a finite Daily 5 first. Additional stories may appear below under a separate “More today” heading.

StoryCard field	Treatment
Category + time	11-12 px label; category uppercase; Slate
Headline	16 px / 22, 650; maximum 3 lines
Summary	14 px / 20; maximum 3 lines
Thumbnail	Documentary image; 12 px radius; no politician-only hero crops
Bookmark	44 px hit target
Pressed state	Soft Teal tint; no dramatic scale

Everyday and Go Deeper views

Area	Everyday	Go Deeper
Header	Back, save, share, overflow	Same shared header
Story meta	Category, read time, updated timestamp	Same; preserve continuity
Depth control	Segmented tabs with Everyday active	Go Deeper active with gold underline/accent
Content	What happened, Why it matters, Your connection	Key details, bill/status facts, sponsor, committee, estimate, next step
Supporting UI	Local relevance panel and representative connection	Topic chips, source links, timeline and full-text action
Tone	Short paragraphs and plain language	More detail without changing products or becoming a dense terminal

Everyday section order

What happened → Why it matters → Who is involved → What happens next → Your connection → What is uncertain → Sources and update history

Source citations

- High-stakes claims receive inline source affordances, not merely a footer list.
- Updated time must be visible near the headline. Evolving stories include a “What changed” log.

Trust as a visible product feature

- Top tabs: Overview, Sources, Timeline. Active tab uses a thin Signal Gold underline, not a red alert treatment.
- Source rows sit in a white card and include a neutral icon, source title, domain, source-type label and external-link icon.
- Preferred source order: Primary source, Official data, Nonpartisan analysis, reputable Reporting, then clearly labeled Opinion.
- Footer callout on Warm Sand: “We link to primary sources so you can read for yourself.”
- Show corrections and update history. Never hide uncertainty or disputed status.

Badge	Examples
PRIMARY	Bill text, court opinion, agency release
OFFICIAL DATA	Census, CBO, election board, agency datasets
NONPARTISAN ANALYSIS	CBO analysis, CRS, inspector general
REPORTING	Reputable fact-based reporting
OPINION	Explicitly labeled commentary only

Make political representation concrete

- Hero row: circular official photo, name, office, district and share action. Avoid party-color framing.
- Full-width Deep Teal “Contact Office” action followed by four circular quick actions: Call, Email, Website, Directions.
- Tab bar: Overview, Votes, Activity, About. Active tab uses gold underline.
- Overview explains what the office controls before showing political activity.
- Use icon-and-text rows for jurisdiction, office address and phone. Keep copy compact and actionable.
- Never infer political preference from ZIP code, reading behavior or saved stories.

Discovery and settings

Page	Specification
Explore	Title and search field. Topic chips in Warm Sand/Soft Teal. “Around the world” module with muted map and one active highlight color. Story cards beneath. Avoid complex charts on the landing page.
Profile	Deep Teal identity header with name and email. White grouped settings cards. Rows use icon, label, current value and chevron. Include ZIP, notifications, briefing time, display, saved stories, reading history, privacy and source policy.
Saved	Use the same StoryCard component with saved timestamp and optional folder/filter chips.

Page	Specification
Empty states	Short, human copy; one clear next action; no cartoonish or celebratory treatment.

Recommended Claude Code architecture

Suggested stack

- Next.js App Router + TypeScript + Tailwind CSS or CSS Modules.
- Lucide icons at approximately 1.75 px stroke, rounded line caps.
- Use CSS variables for all design tokens. Do not hard-code substitute colors in components.
- Build at 390 x 844 first. Complete visual parity before responsive desktop behavior or backend integration.

Route map

Route	Screen
/onboarding/welcome	Welcome
/onboarding/location	ZIP code
/onboarding/representatives	Representative confirmation
/onboarding/notifications	Notifications
/today	Daily 5
/stories/[slug]	Everyday story
/stories/[slug]?depth=deep	Go Deeper
/stories/[slug]/sources	Sources and timeline
/representatives/[id]	Representative profile
/explore	Explore
/saved	Saved
/profile	Profile and settings

Component naming

Use predictable names that map design to code: `StoryCard/Default`, `StoryCard/Compact`, `Button/Primary`, `Chip/Selected`, `SourceRow/Primary`, `RepresentativeRow/Federal`, `Tabs/StoryDepth`.

11 / CSS TOKENS

Copy into the project

```
:root {
  --color-ink: #101418;
  --color-paper: #F7F6F2;
  --color-surface: #FFFFFF;
```

```

--color-slate: #5D6670;
--color-line: #DDE1E5;
--color-teal: #167D79;
--color-teal-strong: #0D5F5B;
--color-teal-soft: #DCE FED;
--color-gold: #D9A441;
--color-sand: #EEE9DE;
--color-coral: #B84E3C;

--radius-card: 16px;
--radius-sheet: 24px;
--radius-button: 12px;
--radius-pill: 999px;

--space-1: 4px;
--space-2: 8px;
--space-3: 12px;
--space-4: 16px;
--space-6: 24px;
--space-8: 32px;
--space-12: 48px;

--mobile-gutter: 20px;
--motion-fast: 150ms;
--motion-standard: 200ms;
}

```

12 / ACCEPTANCE CHECKLIST

Do not mark the refresh complete until all items pass

- [] All screens visually match the approved mockup sheet at 390 x 844.
- [] Lowercase politick wordmark and gold signal dot are used consistently.
- [] No blue/red partisan palette, patriotic motifs or generic news-app redesign.
- [] Paper background, white cards, Deep Teal actions and Signal Gold accents match tokens.
- [] Card radii, borders, spacing and typography are consistent across routes.
- [] Today shows a finite Daily 5 and visible progress.
- [] Story detail supports Everyday and Go Deeper without feeling like separate products.
- [] Sources, update time, uncertainty and correction history are visible.
- [] Representative pages explain role and jurisdiction before political activity.
- [] All touch targets are at least 44 x 44 px and contrast meets WCAG 2.2 AA.
- [] Dynamic Type / 200% scaling does not clip essential content.
- [] No fake production data is presented as live; demo content is labeled or isolated in fixtures.

13 / CLAUDE KICKOFF PROMPT

Paste this into Claude Code

Read this UI guide and inspect `public/politick-approved-mockups.png` before changing code. Treat the mockup image as the visual source of truth. Refresh the Politick UI to match it exactly; do not redesign, rebrand or substitute a generic political-news aesthetic.

Build the token layer and shared components first, then implement every route at a 390 x 844 viewport. Use the approved Paper, White, Civic Ink, Civic Teal, Deep Teal, Slate, Signal Gold and Warm Sand palette. Use Inter, 20 px mobile gutters, 16 px cards, restrained 1 px borders and minimal shadows. Keep the lowercase politick wordmark and one gold signal dot.

Implement onboarding, Today / Daily 5, Everyday story detail, Go Deeper, Sources, representative profile, Explore, Saved and Profile. Preserve the exact hierarchy, spacing, card composition and bottom navigation shown in the reference. Do not add flags, stars, Capitol imagery, red-versus-blue framing, glossy gradients, glassmorphism or breaking-news visual urgency.

Use demo fixtures for content and keep components ready for real APIs. After each page, compare it against the reference at 390 x 844 and correct spacing, type, color, radius and alignment differences before moving on. Finish by running the acceptance checklist in this document and report any intentional deviations.
